1 Introduction.

Originally I wanted a piece of software that would check my works' syndicate lottery numbers automatically for me. It had to have the following criteria: -

- UK National Lottery results had to be obtained directly from the Internet.
- The user interface had to be logical and easy to use.
- Easy input and tracking of lottery tickets and winnings.
- Minimum user input for using the software.
- It had to be Free.

The UK National Lottery Results/Ticket Checker was created. It at least meets the criteria originally set.

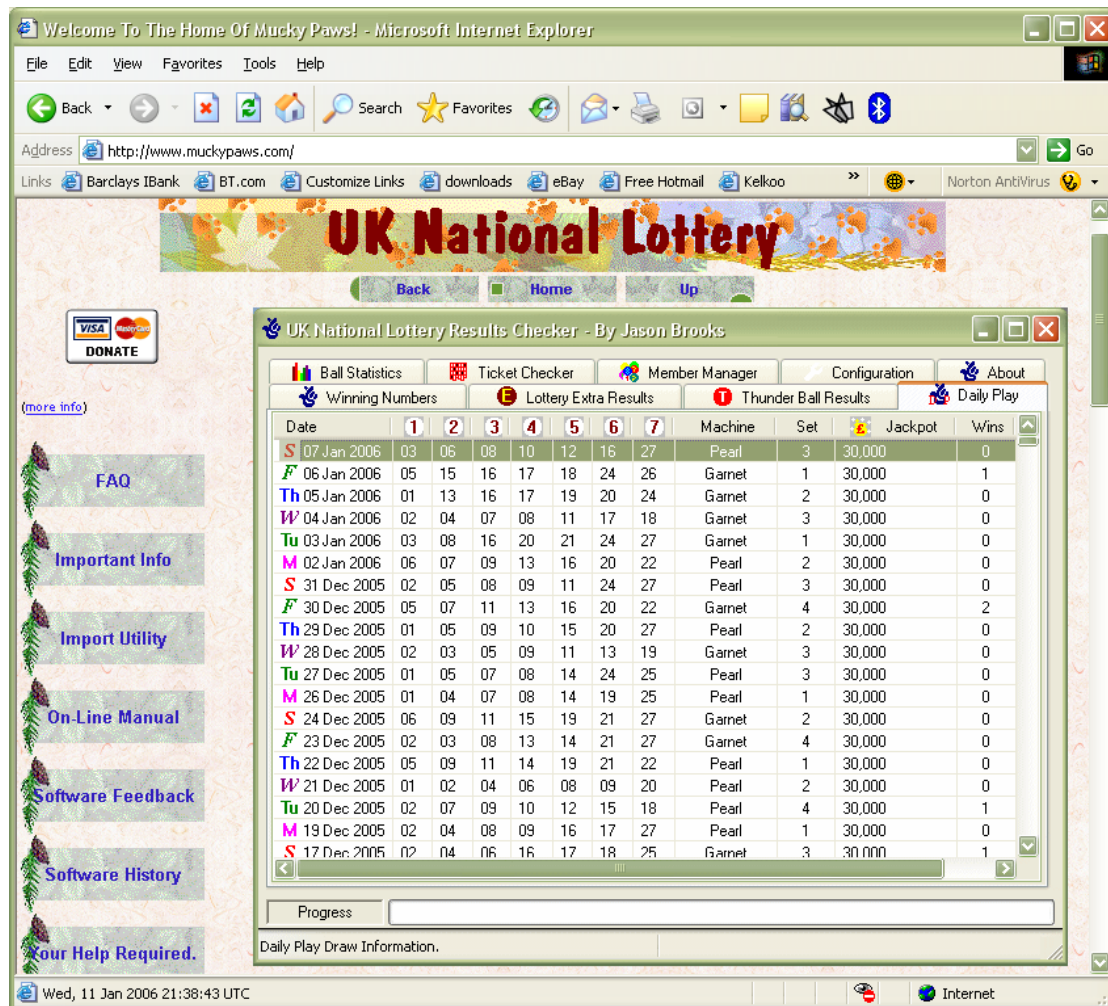

After releasing the software to the internet community, it became apparent that more could be done to enhance the software's interface, including additional easy to use features. With the help of suggestions from volunteers, the software has grown in complexity and functionality. Consequently it became inevitable that the interface would need a user manual to explain many of the features of the software.

This document will hopefully explain how to install and use each of the components of the software.

If you believe a section can be explained more clearly, please contact the Author detailing the change/clarification required.

2 Downloading Instructions.

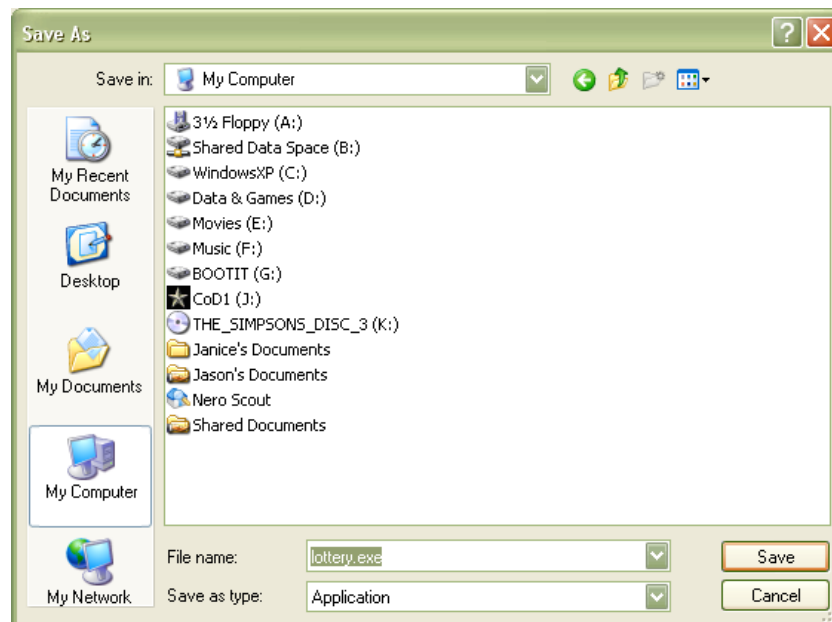

To download the software, go to my web site (Details provided at the end of this document) and click on the screen shot as shown below.

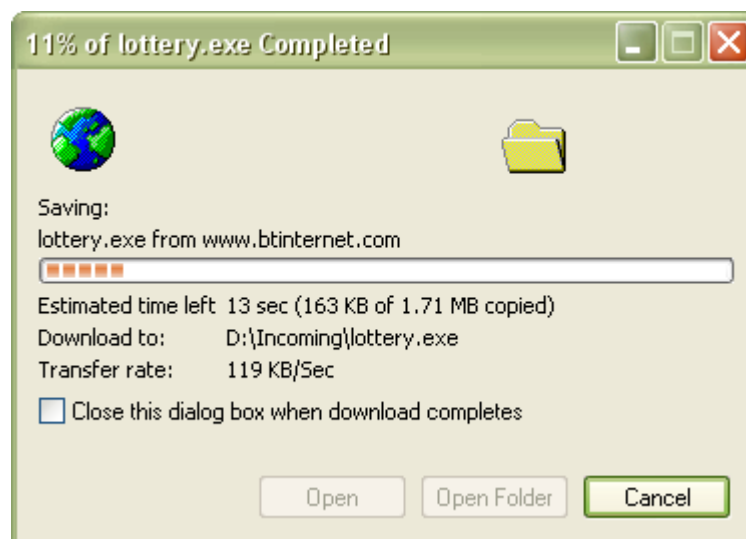

If you are using Internet Explorer, you will be asked what you would like to do with the program. Choose Save this program to disk.

You will be asked where to save software. Usually this will be your Temporary Directory, or your preferred location.

When the download has successfully completed, you can either open the folder, or the application. If you do not wish to install the software until a later time, remember, or make a note of where you saved the application and use Windows Explorer to run the setup.

2.1 Virus'

Every effort has been made to provide this software free from Virus, or other malicious code. The software is scanned with the latest virus definition file from Norton's Anti-Virus checking software.

If you believe the file you have downloaded is infected, please contact the author for a replacement.

It is a sensible precaution to virus check any software you download from the Internet.

3 Installation

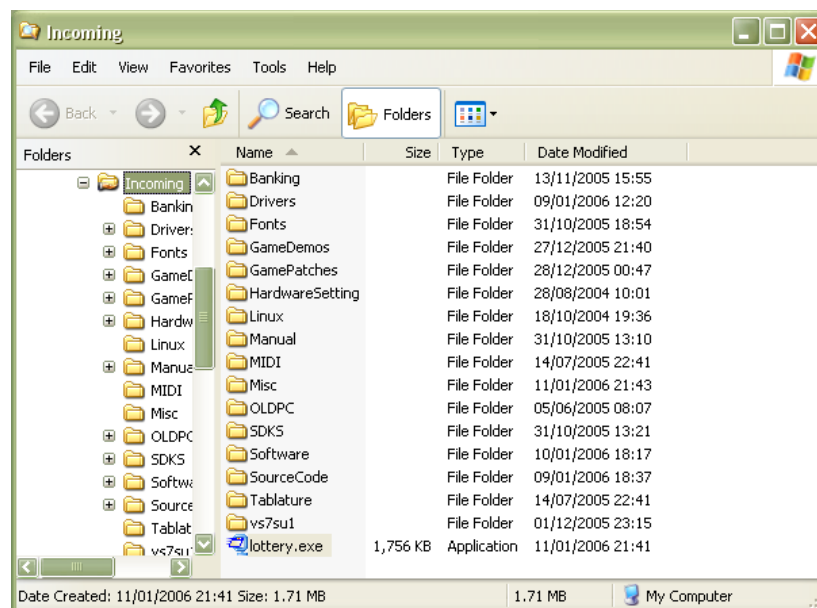

3.1 Do you have the latest software version?

Before installing your software, please go to my web site to ensure you have the latest software version. In doing so, you will guarantee you have the most up to date version of software.

Contact details are provided at the end of this document.

3.2 Running Install-shield.

Double click the Lottery Icon from within Program Manager.

You will see the following dialog box. Now click Run.

Install shield will initialise and set-up will begin.

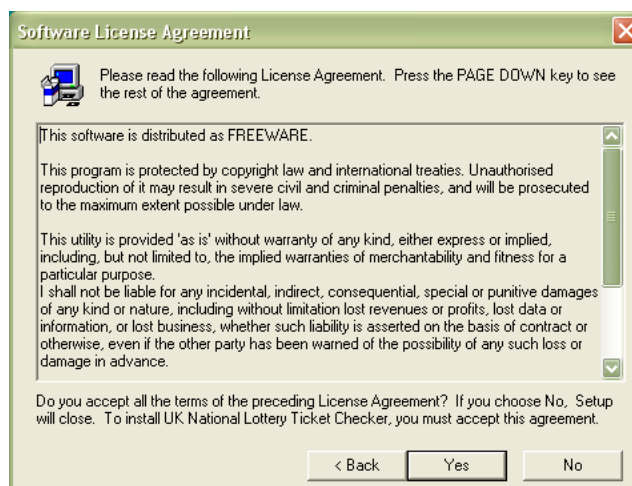

Install shield will take you through the following screens :-

3.3 Setup - Welcome Screen.

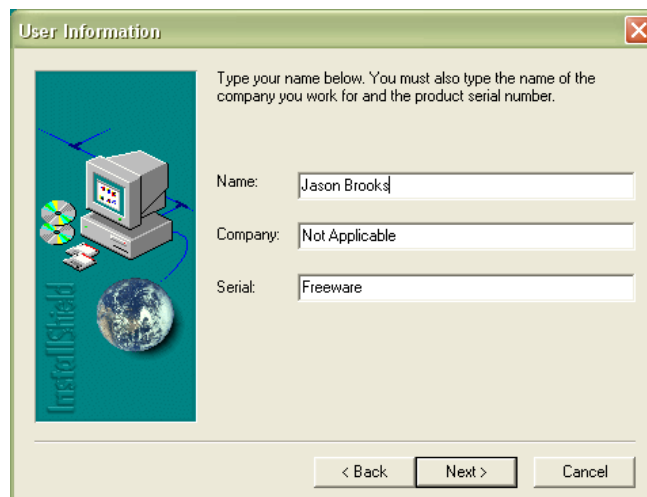

Click Next to continue.

3.4 Setup - Software License Agreement.

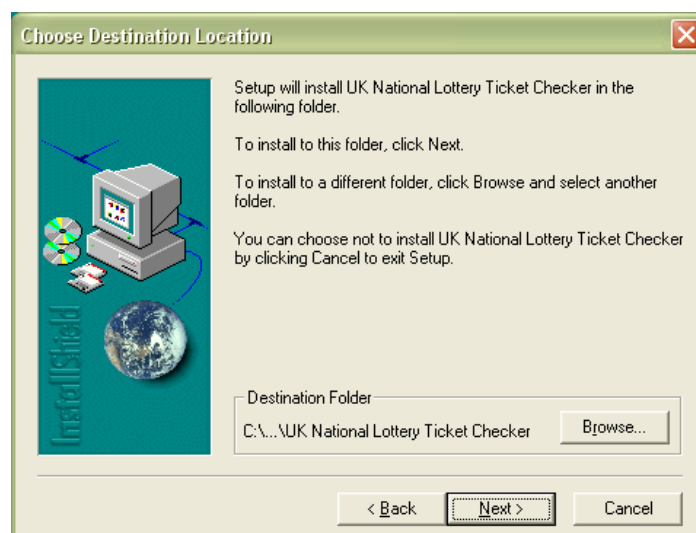

Click Yes to continue with the installation, or No to quit.

3.5 Setup – User Information Screen

You can enter your own name, or that of your syndicates. Click Next to continue.

3.6 Setup – Choose Destination Location Screen.

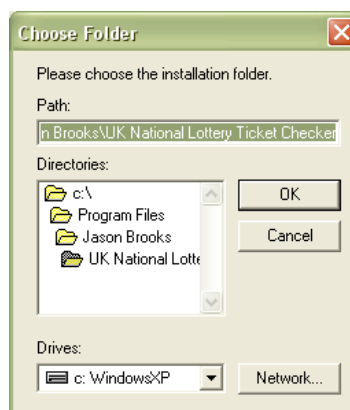

This will ask you where you want to install the lottery software, by default this will be:-

C:\Program Files\Jason Brooks\UK National Lottery Ticket Checker

However, you can specify your own location by clicking Browse.

3.7 Setup - Choose Folder Screen.

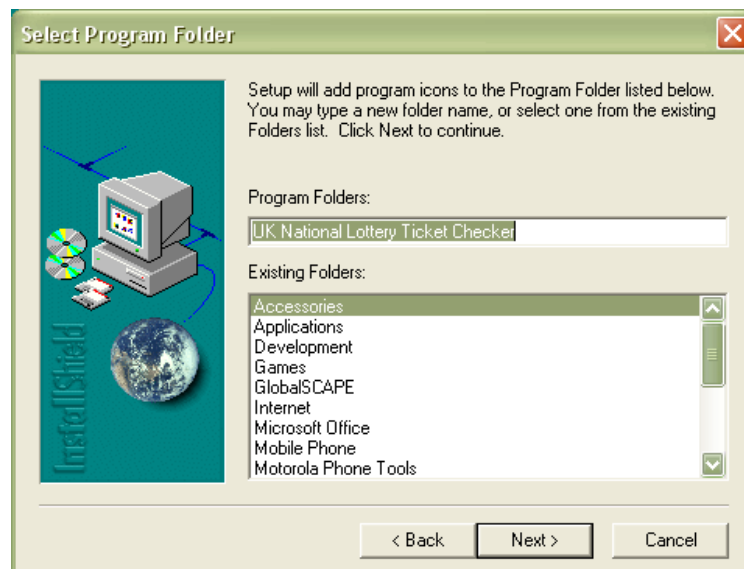

By clicking Browse on the previous screen, you will be presented with the above folder. You can now choose the destination directory where you want to install the software.

Important. Do not try and install the software into the same directory as the setup program.

For example, if you have downloaded the software into *C:\TEMP*, then choose a different directory path, i.e. *C:\TEMP\LOTTERY*, otherwise you will receive an error message and the program will quit.

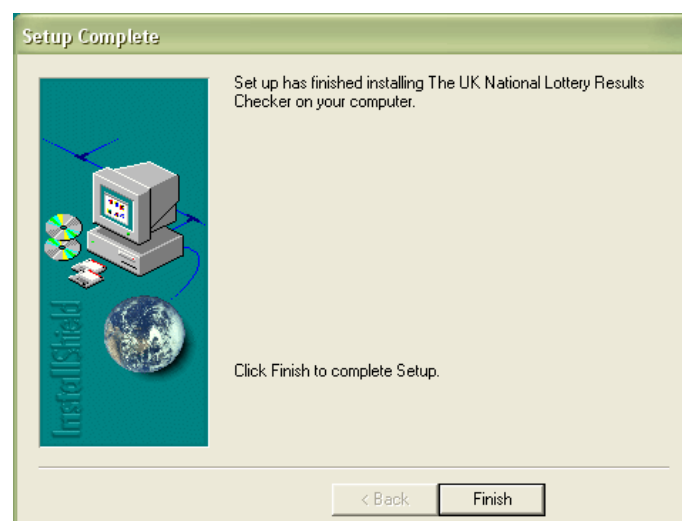

3.8 Setup – Select Program Folder Screen.

The above screen will ask you where you want the Lottery Icon and Programs to be installed.

Important. Do not choose a folder that already exists, as sometimes when uninstalling with InstallShield, the whole Folder may be deleted.

3.9 Setup – Complete Screen.

If the software was successfully installed, you will see the above message. Click finish and you are almost ready to start.

3.10 Internet Caching Options.

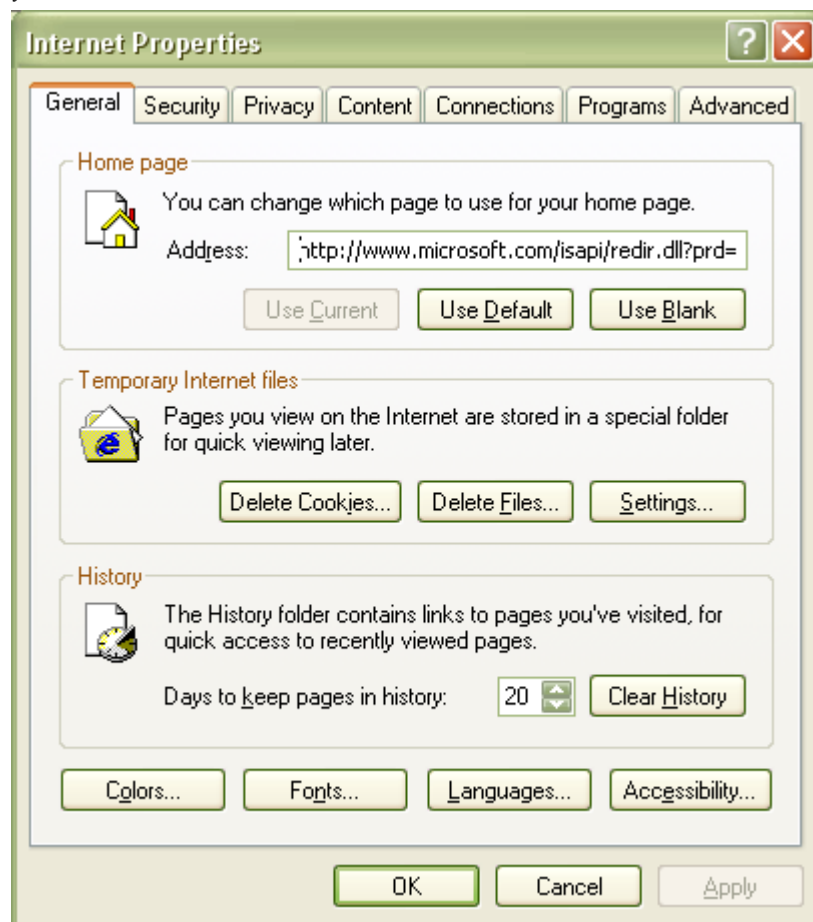

If you are using software such as DUN, Net Accelerator, or other Internet caching/acceleration software, you may have to consult with your software user guide on how to ensure that the web page is refreshed each time you visit the site.

Reports have been received, that users are not getting the latest updates directly from the Internet. The most common cause is attributed to Internet Explorer's Caching options. The following will demonstrate a known solution if you are experiencing this problem.

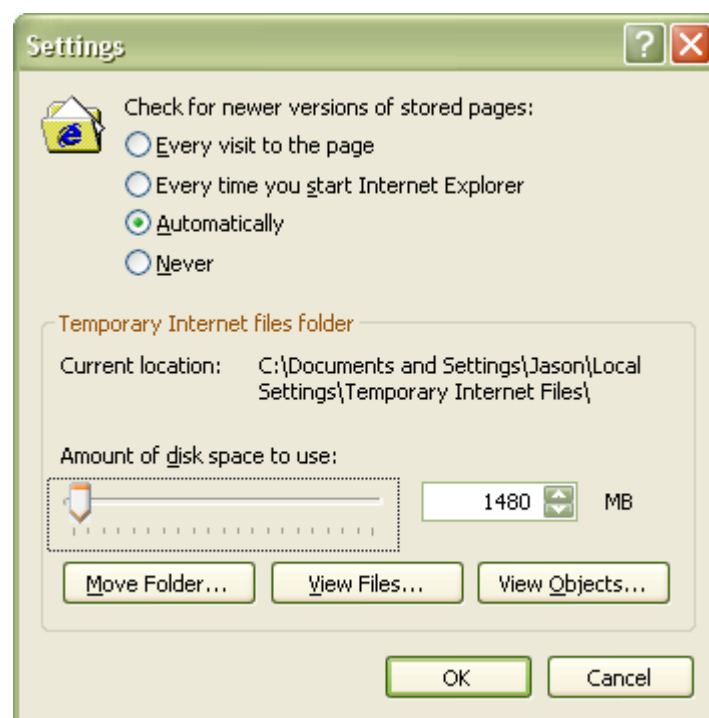

From the control panel, select Start->Settings->Control Panel and double click on the Internet Options Icon.

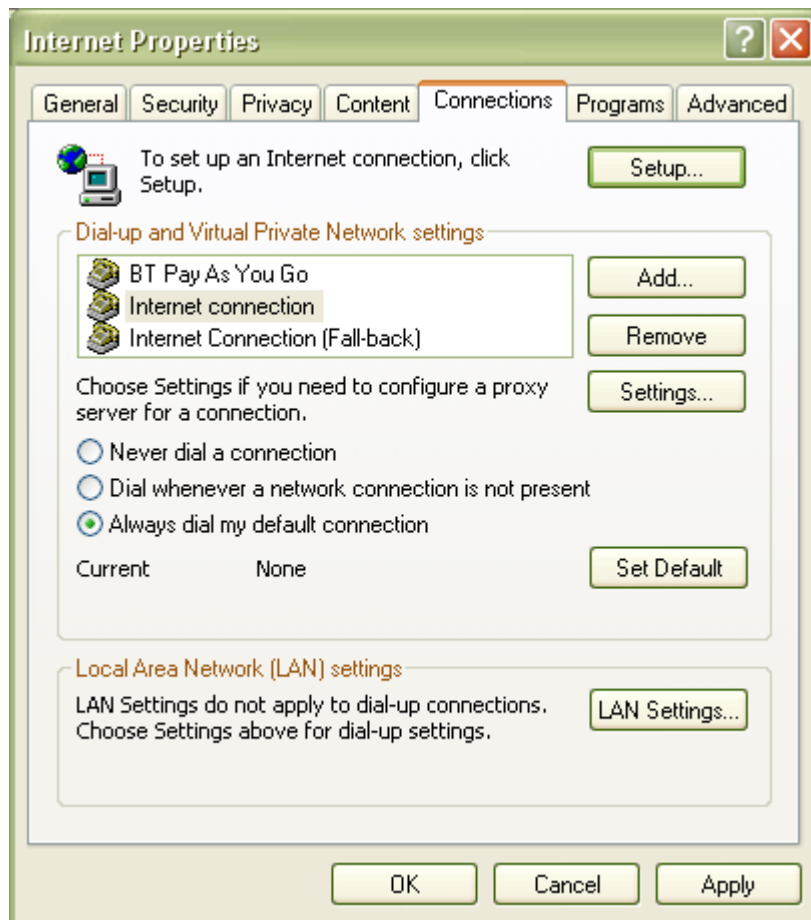

From the Temporary Internet Files Section, click Settings.

Select either *Automatically*, or *Every visit to the page* and click OK.

If you have a dial-up account, Select the connections tabe and by selecting *Always dial my default connection* will ensure that the software can try to obtain an internet connection when required, your default Dial Up connection will popup.

Click on OK and close the Control Panel.

4 Welcome Page

Start the application by clicking Start -> Programs -> UK National Lottery -> Lottery.

You will see the splash screen, the program may take a while to initialise.

5 Winning Numbers

The winning numbers tab shows the latest UK National Lottery Results. There are several columns providing information about the current lottery draw.

Date:

Provides the date for each draw, the ICON to the left clearly showing if this is a Wednesday or Saturday evening draw.

W - Wednesday Night Draw

S - Saturday Night Draw

The following column Icons indicates which ball was drawn. NB. This information is supplied in numerical order and not the order in which the balls were drawn.

1 - Ball Number One.

2 - Ball Number Two.

3 - Ball Number Three.

4 - Ball Number Four.

5 - Ball Number Five.

6 - Ball Number Six.

B - The Bonus Ball.

Machine:

Which machine was used for the lottery draw.

I.e. *Arthur*, *Guinevere*, *Lancelot*, *Moonstone*, *Opal* etc.

Set:

Which ball set was used for the lottery draw. (Currently 1 – 14)

**Jackpot:**

The Jackpot amount received by each winner. Please note that this is not the total jackpot available for that draw.

Wins:

The total number of Jackpot winners for this draw.

(£) 5+Bonus:

The prize win amount for getting 5 Balls plus the bonus ball correct.

(£) 5 Balls:

The prize win amount for getting 5 Balls correct.

(£) 4 Balls:

The prize win amount for getting 4 Balls correct.

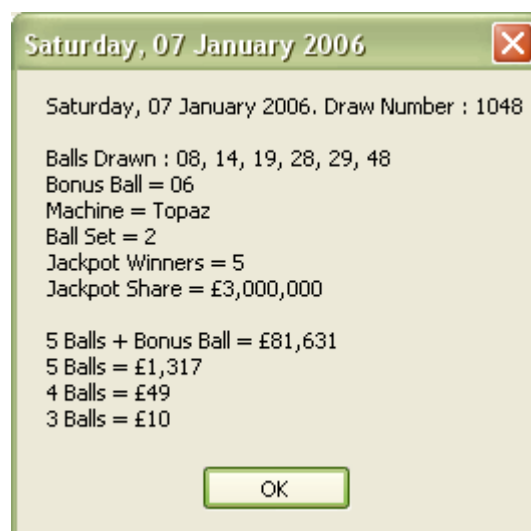

(£) 3 Balls:

The prize win amount for getting 3 Balls correct. Currently this is £10, however camelot introduced a rule whereby they can reduce this amount if too many people get 3 balls correct.

Draw:

The lottery draw number.

You can double click any lottery row and the following information will be displayed.

5.1 The Push Button.

The push button will display one of two states. If an update is required from the Internet you will see the button enabled and showing the following message: -

This button will also be enabled if the download of the lottery results does not contain all the information required. For example, the number of Jackpot Winners and Jackpot amount, may not be available for up to one hour after the draw has taken place.

This does not prevent the checking of your lottery numbers.

5.2 The Internet Update Query.

The first time you run the Lottery program, an Internet Update will be required. You will see the following message box asking if it can download the latest information. You will also see this message if the software believes newer lottery results are available.

If you are a broadband user or connected via a LAN, you can switch off the ask permission function and let the software automatically download results on startup. See the configuration section of this guide.

If you answer NO, some functionality may be disabled from the software.

By answering YES, the following web pages are obtained from the Internet:-

5.2.1 Main Lottery URL

<http://lottery.merseyworld.com/cgi-bin/lottery?days=2&Machine=Z&Ballset=0&order=1&show=1&year=0&display=CSV>

5.2.2 Thunder Ball URL

<http://lottery.merseyworld.com/cgi-bin/lottery?days=10&Machine=Z&Ballset=0&order=1&show=1&year=0&display=CSV>

5.2.3 Prize Information URL

<http://lottery.merseyworld.com/cgi-bin/lottery?days=2&Prizes=2&Sort=0&year=0&display=CSV>

5.2.4 Lottery Extra Information URL

<http://lottery.merseyworld.com/cgi-bin/lottery?days=6&Machine=Z&Ballset=0&order=1&show=1&year=0&display=CSV>

5.2.5 Daily Play Information URL

<http://lottery.merseyworld.com/cgi-bin/lottery?days=12&Machine=Z&Ballset=0&order=1&show=1&year=0&display=CSV>

5.2.6 Daily Play Prize Information URL

<http://lottery.merseyworld.com/cgi-bin/lottery?days=12&Prizes=1&Sort=0&year=0&display=CSV>

5.2.7 Message Of The Day.

<http://www.btinternet.com/~jason.brooks/lotterymotd.text>
http://www.btinternet.com/~jason.brooks/Lottery_MOTD/lottery_info.htm

5.2.8 Update/Latest Version Info.

<http://www.btinternet.com/lotteryupdate.info>

5.3 Username And Password Prompt.

If you are using the software behind a firewall (usually at work), you may be prompted for your Internet Username and Password via this screen.

Enter the username and password you would normally use to access web pages outside your company's intranet. You may need to consult with your Local System Administrator for details on how to do this.

Please be assured that your Username and Password is not stored in your system registry, or passed to other users on the Internet.

N.B. The Firewall support is only supported for Basic Authentication.

5.4 New Release Information.

If a new release of this software has been detected, you will receive one of three notification messages: -

5.4.1 Minor Update Available.

This message indicates that the newest release contains minor bug fixes. You may want to visit the web site to find more details on the changes made.

5.4.2 Functional Update Available.

This message indicates that the newer version has some functional modifications made to it. For example a new form of report writing, or the ability to print from the software.

5.4.3 A New Major Release Available.

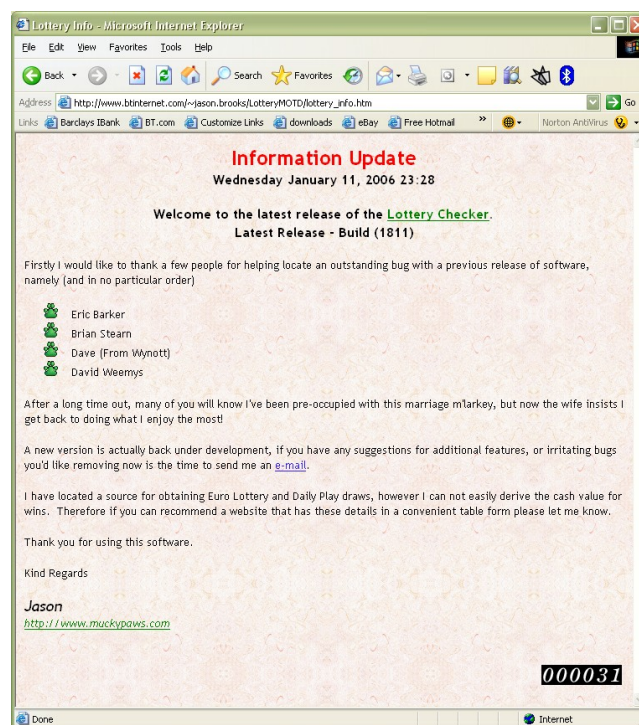

This message indicates that a newer version with a major revision or functionality changes, has been made.

In all cases, you will not see this message again, until a newer version than the previous version has been detected. For example, if you are currently running on version 1.7 Build 1812 and Build 1813 is available, you will only be notified once, until a version build greater than 1813 has been released.

By clicking yes, Internet Explorer will open up the web page for my web site. Follow the instructions on the site for installing or upgrading your software.

5.5 Message Of The Day.

Whilst updating the software over the Internet, I may wish to pass messages on to you concerning the latest lottery release, or other related info, when a new message is available your default web browser will open up the MOTD page.

5.6 Saving The Lottery Results.

If a lottery results file (*.NLR) has not been assigned, you will be asked for a location to save the results on closing the program.

5.7 Error Messages.

You may see the following error message: -

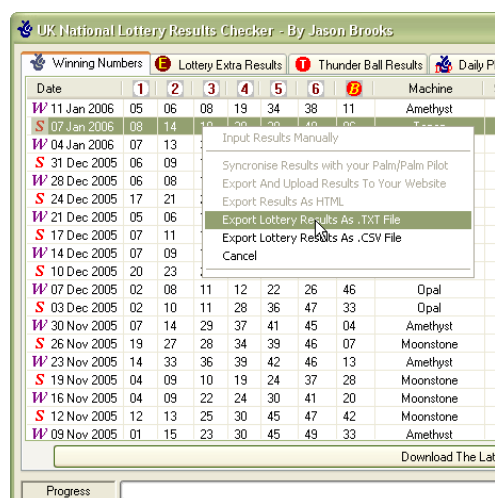

This is caused by the National Lottery Results file, either being corrupt, damaged or deleted from your system. Click OK to this message. The lottery results will be unavailable and you will need to download the latest results from the Internet. You will be asked to save the results when you exit the program.

5.8 Extra Menu Options.

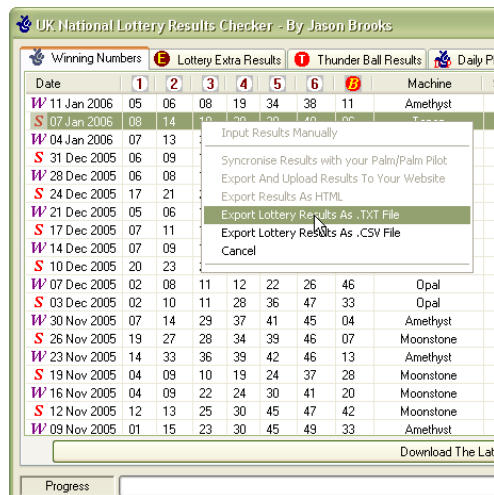

You can access extra options by Right clicking anywhere within the lottery numbers section, you will be given three choices: -

- Export Lottery Results As .TXT File
- Export Lottery Results As .CSV File
- Cancel

5.8.1 *Export Lottery Results As .TXT File.*

Use this option to save the National Lottery Results as a .TXT file, which can be opened with Notepad, or your favourite text editor.

5.8.2 *Export Lottery Results As .CSV File.*

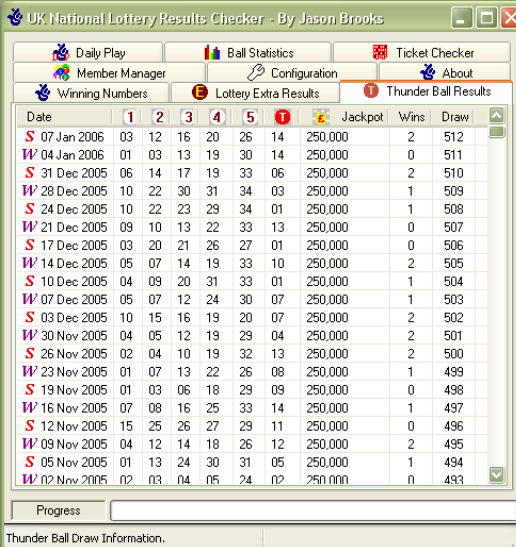

Use this option to save the National Lottery Results as a .CSV (Comma Separated Values) file, which can be opened with your spreadsheet application (I.e. Microsoft Works Spreadsheet, Excel, OpenOffice etc).

5.8.3 *Cancel.*

Doesn't perform any useful function.

6 Thunder Ball Results

The Thunder Ball Results tab shows you the latest UK National Lottery Thunder Ball Results. There are several columns providing information about the current lottery draw.

Date	1	2	3	4	5	T	Jackpot	Wins	Draw
S 07 Jan 2006	03	12	16	20	26	14	250,000	2	512
W 04 Jan 2006	01	03	13	19	30	14	250,000	0	511
S 31 Dec 2005	06	14	17	19	33	06	250,000	2	510
W 28 Dec 2005	10	22	30	31	34	03	250,000	1	509
S 24 Dec 2005	10	22	23	29	34	01	250,000	1	508
W 21 Dec 2005	09	10	13	22	33	13	250,000	0	507
S 17 Dec 2005	03	20	21	26	27	01	250,000	0	506
W 14 Dec 2005	05	07	14	19	33	10	250,000	2	505
S 10 Dec 2005	04	09	20	31	33	01	250,000	1	504
W 07 Dec 2005	05	07	12	24	30	07	250,000	1	503
S 03 Dec 2005	10	15	16	19	20	07	250,000	2	502
W 30 Nov 2005	04	05	12	19	29	04	250,000	2	501
S 26 Nov 2005	02	04	10	19	32	13	250,000	2	500
W 23 Nov 2005	01	07	13	22	26	08	250,000	1	499
S 19 Nov 2005	01	03	06	18	29	09	250,000	0	498
W 16 Nov 2005	07	08	16	25	33	14	250,000	1	497
S 12 Nov 2005	15	25	26	27	29	11	250,000	0	496
W 09 Nov 2005	04	12	14	18	26	12	250,000	2	495
S 05 Nov 2005	01	13	24	30	31	05	250,000	1	494
W 02 Nov 2005	02	03	04	05	24	02	250,000	0	493

Date:

Provides the date for each draw, the ICON to the left clearly showing that the draw currently takes place on a Saturday evening.

W - Wednesday Night Draw

S - Saturday Night Draw

The following columns show which ball was drawn in numerical order.

1 - Ball Number One.

2 - Ball Number Two.

3 - Ball Number Three.

4 - Ball Number Four.

5 - Ball Number Five.

T - Thunder Ball.

Jackpot:

The Jackpot amount received by each winner. This is currently £250,000 though Camelot reserve the right to alter this if too many get all the numbers correct.

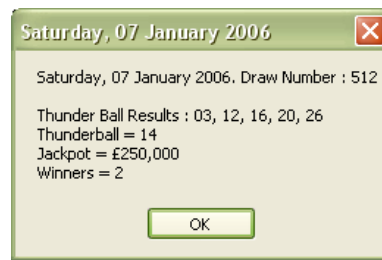

Wins:

The total number of Jackpot winners for this draw.

Draw:

The Thunder Ball draw number.

You can double click any Thunder Ball row and the following information will be displayed.

6.1 Updating Thunder Ball Information.

To obtain Thunder Ball Updates via the Internet, you must click on the Winning Numbers Tab .

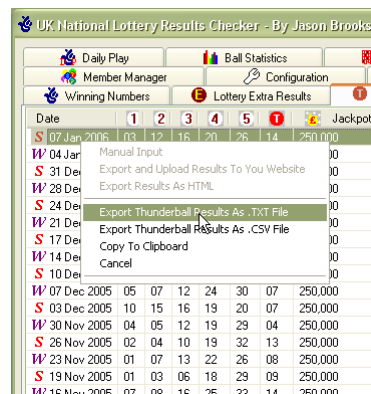

6.2 Extra Menu Options.

You can access extra options by Right clicking anywhere within the results' section. You will be given three choices: -

- Export Thunderball Results As .TXT File
- Export Thunderball Results As .CSV File
- Copy To Clipboard
- Cancel

6.2.1 Export Thunderball Results As .TXT file.

Use this option to save the Thunder Ball Lottery Results to a .TXT file that can be opened with Notepad or your favourite text editor.

6.2.2 Export Thunderball Results As .CSV file.

Use this option to save the Thunderball Lottery Results as a .CSV (Comma Separated Values) file, which can be opened with your spreadsheet application (I.e. Microsoft Works Spreadsheet, Excel, OpenOffice etc).

6.2.3 Copy to Clipboard

By selecting this option, the National Lottery results will be transferred to the window's clipboard and can be pasted into your favourite application, for example Word or Excel.

6.2.4 Cancel.

Does not perform any useful function.

7 Lottery Extra Ball Results

The Lottery Extra Ball Results tab shows you the latest UK National Lottery Extra Results. There are several columns providing information about the current lottery draw.

Date	1	2	3	4	5	6	Machine	Set	Jackpot	Wins	Draw
07 Jan 2006	03	12	33	34	35	48	Amethyst	2	6,361,472	0	538
04 Jan 2006	11	20	21	23	38	40	Topaz	3	6,053,977	0	537

Date:

Provides the date for each draw, the ICON to the left clearly showing that the draw currently takes place on a Saturday evening.

- Wednesday Night Draw

- Saturday Night Draw

The following columns show which ball was drawn in numerical order.

- Ball Number One.

- Ball Number Two.

- Ball Number Three.

- Ball Number Four.

- Ball Number Five.

- Ball Number Six.

Jackpot:

The Jackpot amount received by each winner. This is a rolling jackpot and grows until someone wins the pot. Camelot reserve the right to alter this if too many get all the numbers correct. There is a maximum limit of £50,000,000 and you must get all six numbers correct to win.

Wins:

The total number of Jackpot winners for this draw.

Draw:

The Lottery Extra draw number.

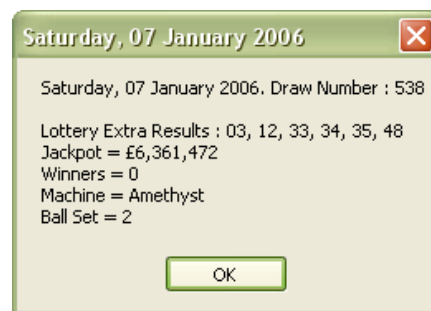

Machine:

The machine used for this draw.

Balls:

The ball set used for this draw.

You can double click any Lottery Extra row and the following information will be displayed.

7.1 Updating Lottery Extra Information.

To obtain Lottery Extra Updates via the Internet, you must click on the Winning Numbers Tab . And follow instructions for downloading the results.

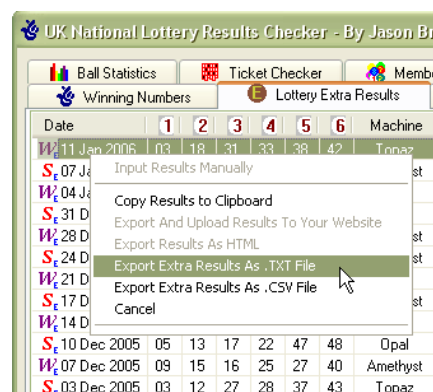

7.2 Extra Menu Options.

You can access extra options by Right clicking anywhere within the results' section. You will be given three choices: -

- Export Lottery Extra Results As .TXT File
- Export Lottery Extra Results As .CSV File
- Copy To Clipboard
- Cancel

7.2.1 Export Lottery Extra Results As .TXT file.

Use this option to save the Lottery Extra Lottery Results to a .TXT file that can be opened with Notepad or your favourite text editor.

7.2.2 Export Lottery Extra Results As .CSV file.

Use this option to save the Lottery Extra Lottery Results as a .CSV (Comma Separated Values) file, which can be opened with your spreadsheet application (I.e. Microsoft Works Spreadsheet, Excel, OpenOffice etc).

7.2.3 Copy to Clipboard

By selecting this option, the National Lottery results will be transferred to the window's clipboard and can be pasted into your favourite application, for example Word or Excel.

7.2.4 *Cancel.*

Does not perform any useful function.

8 Daily Play Ball Results

The Daily Play Ball Results tab shows you the latest UK National Daily Play Results. There are several columns providing information about the current lottery draw.

Date	1	2	3	4	5	6	7	Machine	Set	Jackpot	Wins	Draw
W 11 Jan 2006	01	07	14	15	16	17	19	Garnet	4	30,000	0	721
Tu 10 Jan 2006	03	10	21	22	23	25	26	Pearl	2	30,000	0	720
M 09 Jan 2006	01	02	07	14	17	19	24	Garnet	4	30,000	0	719
S 07 Jan 2006	03	06	08	10	12	16	27	Pearl	3	30,000	0	718
F 06 Jan 2006	05	15	16	17	18	24	26	Garnet	1	30,000	1	717
Th 05 Jan 2006	01	13	16	17	19	20	24	Garnet	2	30,000	0	716
W 04 Jan 2006	02	04	07	08	11	17	18	Garnet	3	30,000	0	715
Tu 03 Jan 2006	03	08	16	20	21	24	27	Garnet	1	30,000	0	714
M 02 Jan 2006	06	07	09	13	16	20	22	Pearl	2	30,000	0	713
S 31 Dec 2005	02	05	08	09	11	24	27	Pearl	3	30,000	0	712
F 30 Dec 2005	05	07	11	13	16	20	22	Garnet	4	30,000	2	711
Th 29 Dec 2005	01	05	09	10	15	20	27	Pearl	2	30,000	0	710
W 28 Dec 2005	02	03	05	09	11	13	19	Garnet	3	30,000	0	709
Tu 27 Dec 2005	01	05	07	08	14	24	25	Pearl	3	30,000	0	708
M 26 Dec 2005	01	04	07	08	14	19	25	Pearl	1	30,000	0	707
S 24 Dec 2005	06	09	11	15	19	21	27	Garnet	2	30,000	0	706
F 23 Dec 2005	02	03	08	13	14	21	27	Garnet	4	30,000	0	705
Th 22 Dec 2005	05	09	11	14	19	21	22	Pearl	1	30,000	0	704

Date:

Provides the date for each draw, the ICON to the left clearly showing that the draw currently takes place on a Saturday evening.

- M** - Monday Draw
- Tu** - Tuesday Draw
- W** - Wednesday Draw
- Th** - Thursday Draw
- F** - Friday Draw
- S** - Saturday Draw
- Su** - Sunday Draw

The following columns show which ball was drawn in numerical order.

- 1** - Ball Number One.
- 2** - Ball Number Two.
- 3** - Ball Number Three.
- 4** - Ball Number Four.
- 5** - Ball Number Five.
- 6** - Ball Number Six.
- 7** - Ball Number Seven.

Jackpot:

The Jackpot amount received by each winner. This is currently £30,000 though Camelot reserve the right to alter this if too many get all the numbers correct.

Wins:

The total number of Jackpot winners for this draw.

Draw:

The Daily Play draw number.

Machine:

The machine used for this draw.

Balls:

The ball set used for this draw.

You can double click any Daily Play row and the following information will be displayed.

8.1 Updating Daily Play Information.

To obtain Daily Play Updates via the Internet, you must click on the Winning Numbers Tab . And follow instructions for downloading the results.

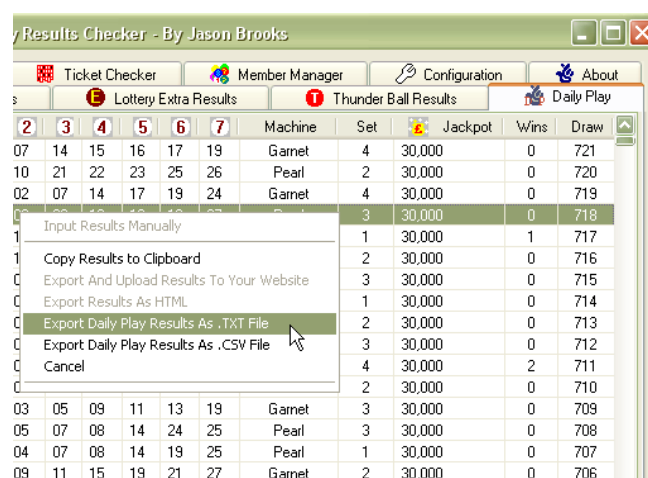

8.2 Extra Menu Options.

You can access extra options by Right clicking anywhere within the results' section. You will be given three choices: -

- Export Daily Play Results As .TXT File
- Export Daily Play Results As .CSV File
- Copy To Clipboard
- Cancel

8.2.1 Export Daily Play Results As .TXT file.

Use this option to save the Daily Play Lottery Results to a .TXT file that can be opened with Notepad or your favourite text editor.

8.2.2 *Export Daily Play Results As .CSV file.*

Use this option to save the Daily Play Lottery Results as a .CSV (Comma Separated Values) file, which can be opened with your spreadsheet application (I.e. Microsoft Works Spreadsheet, Excel, OpenOffice etc).

8.2.3 *Copy to Clipboard*

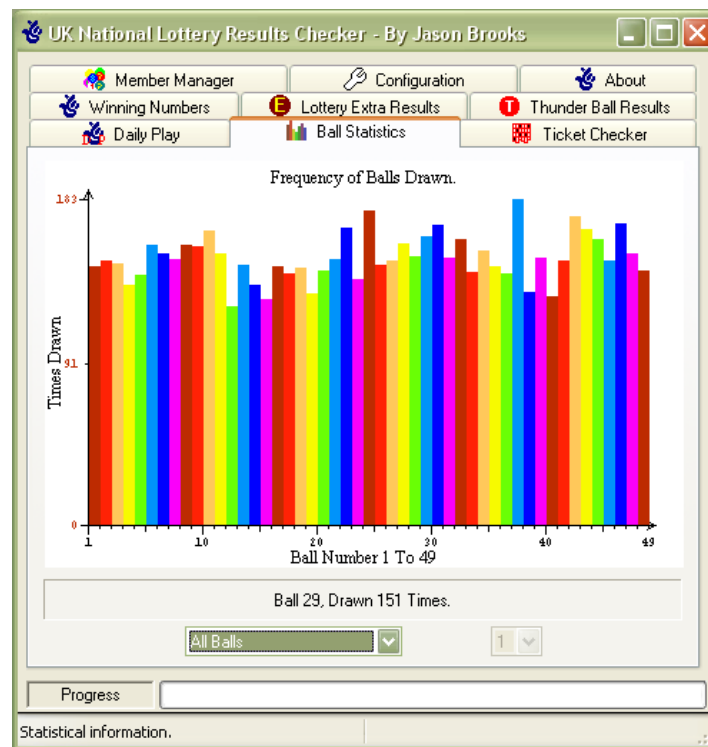

By selecting this option, the National Lottery results will be transferred to the window's clipboard and can be pasted into your favourite application, for example Word or Excel.

8.2.4 *Cancel.*

Does not perform any useful function.

9 Ball Statistics.

The Ball Statistics tab draws a simple Bar chart, demonstrating the frequency of the numbers drawn.

This data can be viewed on the following Criteria: -

- By All Machines Combined.
- By Machine Name.
- By Machine Name and Separate Ball Set (1-14).
- By Thunder Ball.

It currently does not contain any statistical analysis functions and is provided for a bit of fun. If you want to copy the graph directly into your favourite word processor or graphics package, simply press ALT+SHIFT+PRT SC to copy the graph to the clipboard, or Windows XP Users (CTRL+ALT+PRT SC)

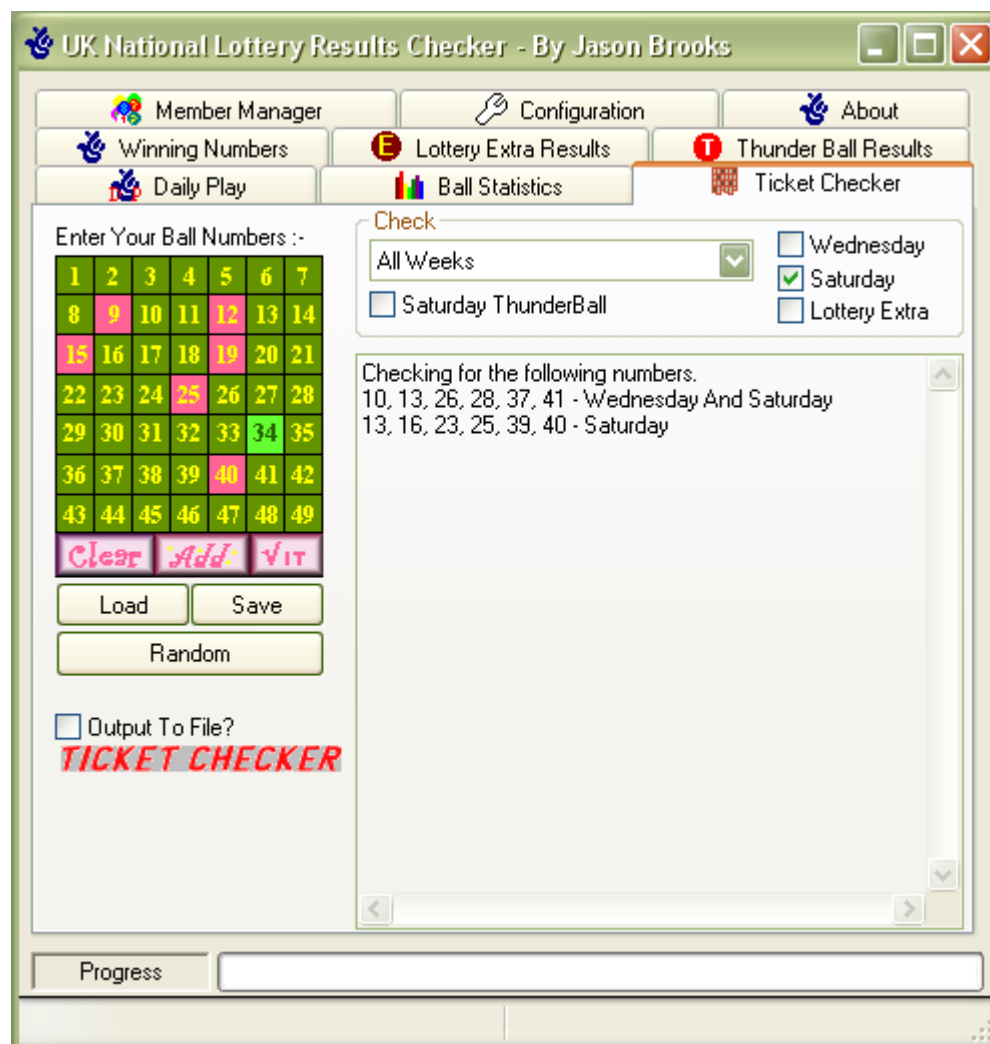

By moving your mouse over the bar graph, the information bar will provide information regarding the ball number and the number of times it has been drawn.

10 Ticket Checker

The Ticket Checker tab is the heart of the program and from here you can check multiple tickets for a combination of Wednesday, Saturday and Thunder Ball draws.

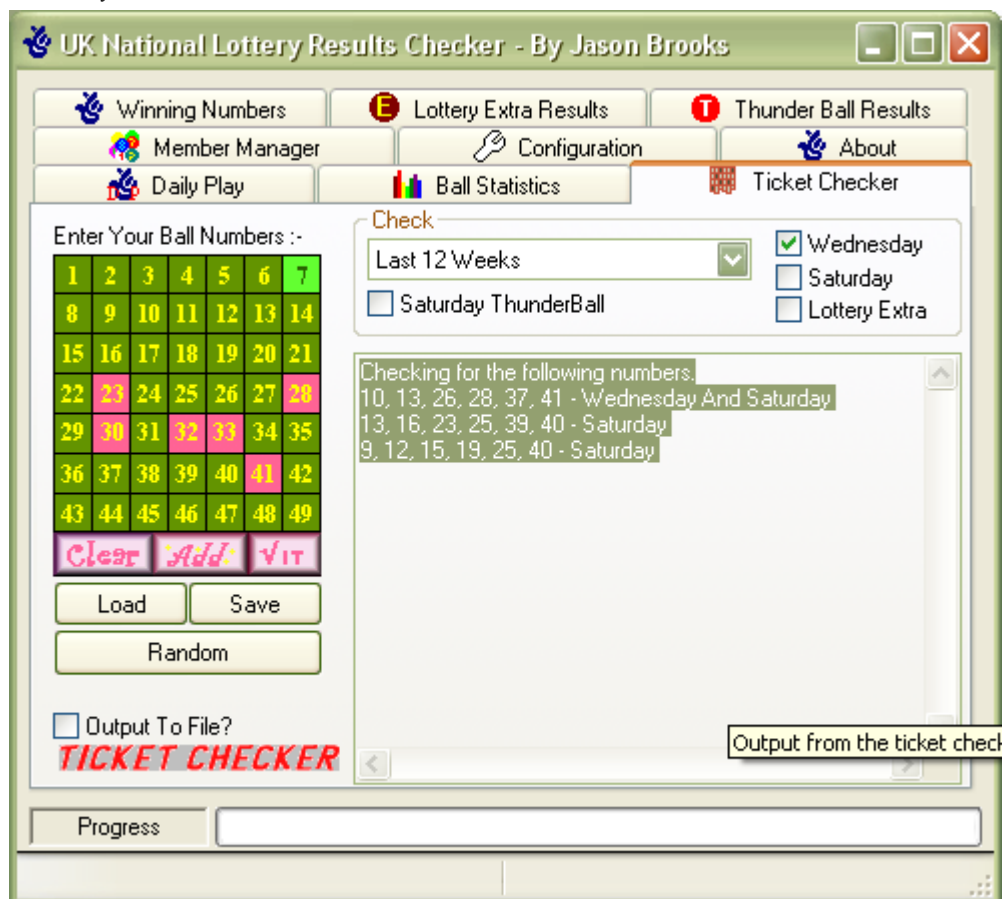

For example, if you want to add two Tickets for draws that take place on Saturday Night, click the number grid to your left with your choice of numbers, or if you are undecided, click the Random button to generate a set of numbers.

In this example, the numbers 7, 12, 16, 26, 37 and 46 have been added for a Saturday Night Draw and the screen may look like this: -

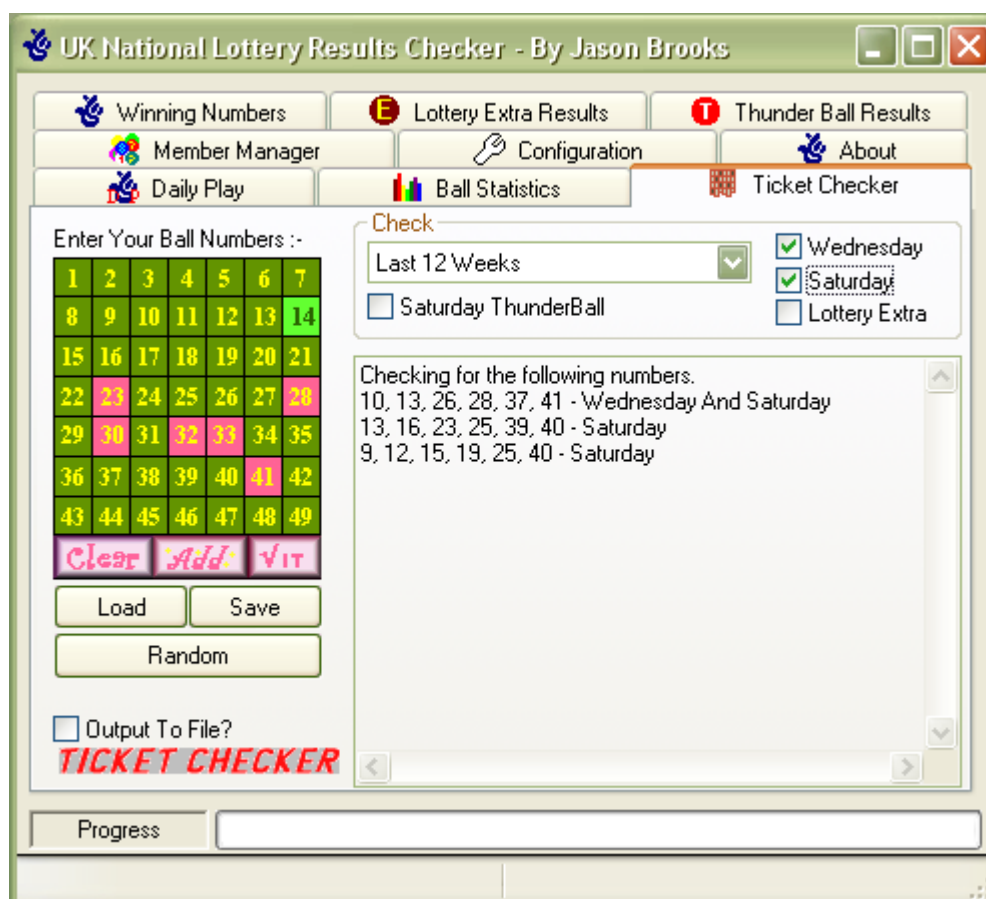

If you decide against a number, simply click the highlighted number again to clear it. To add the number to the list to be checked, click the **Add** Button.

To add a number for the Wednesday Night Draw, simply repeat the process above, this time unchecking Sat and checking Wed, so the screen might look like:-

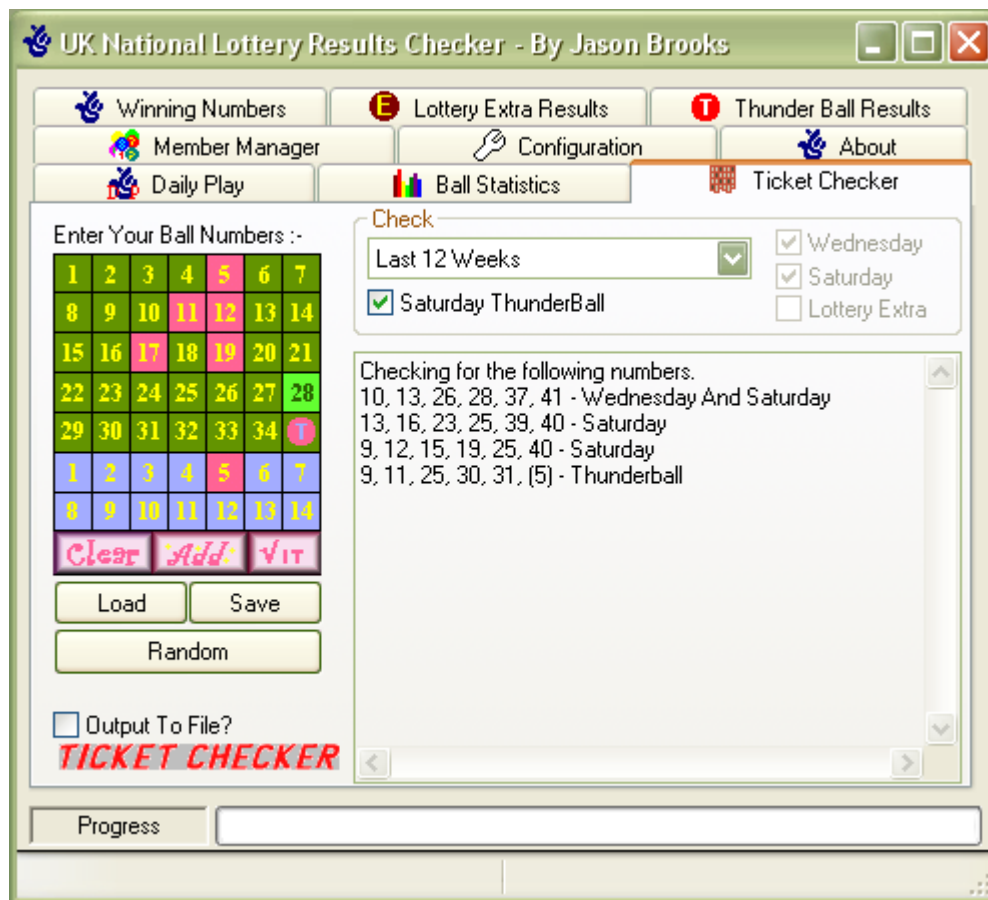

Again, remembering to click the **Add** button.

If you play the same numbers on both Wednesday and Saturday Night, then check both Wed and Sat and Add your numbers, i.e.

To add even more complexity to the program, you might buy Thunder Ball draw tickets at the same time. Simply click the ThunderBall checkbox and  your numbers:-

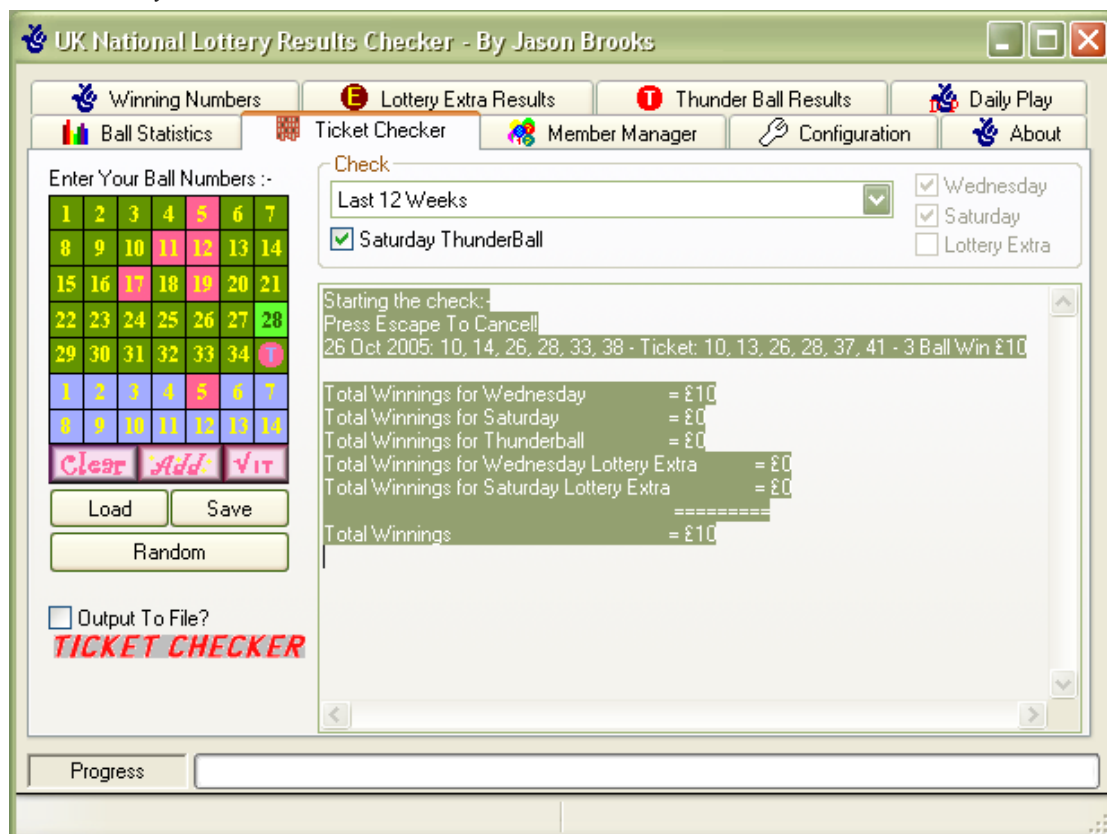

Note the bracketed number is the Thunder Ball.

You can check your numbers, against known results over the following time periods:-

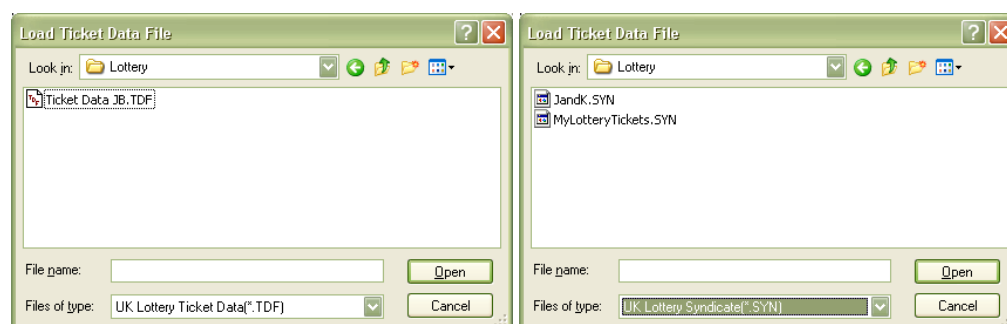

- This Week
- Last 4 Weeks
- Last 8 Weeks
- Last 12 Weeks
- All Weeks

To start the checking of your numbers, click the  button. You will see output similar to the following:-

10.1 Ticket Checker – Load Button

This button will load a previously saved Ticket (*.TDF) or a Syndicate (*.SYN) file into the ticket checker.

10.2 Ticket Checker – Save Button.

This button will prompt you to save the ticket data you have created. This may be useful if you use the same numbers every week, or have a group of friends that use the same numbers.

10.3 Ticket Checker – Clear Button.

This button  will delete all tickets added to the list. If tickets already exist and have not been saved, you will be asked to confirm if this is what you really want to do.

10.4 Ticket Checker – Add Button.

This button  will attempt to add a valid ticket to the current ticket list.

10.5 Deleteing A Ticket.

It is currently not possible to delete a ticket after it has been added to the list.

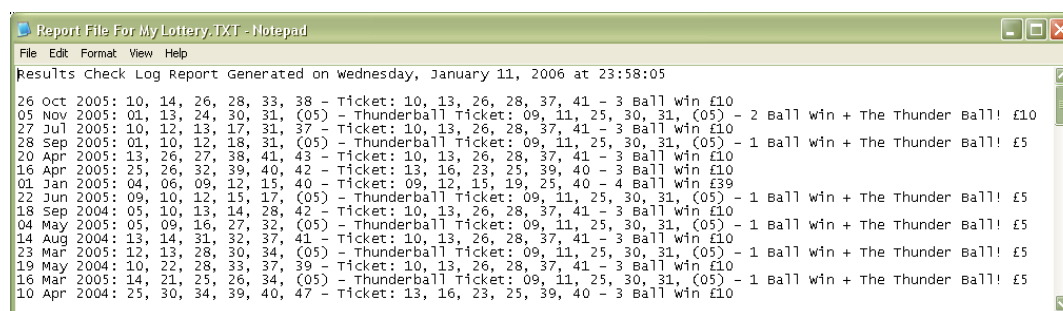

10.6 Output To File?

Select this option if you want to redirect the output from the ticket checker to a .TXT file. This might be useful if you are creating a report for syndicate members, or you may have a large quantity of numbers to check, in which case, due to a limitation of Windows 9x, the output box may not display all of the data.

If this option is selected and you have pressed  you will be asked where to save the file.

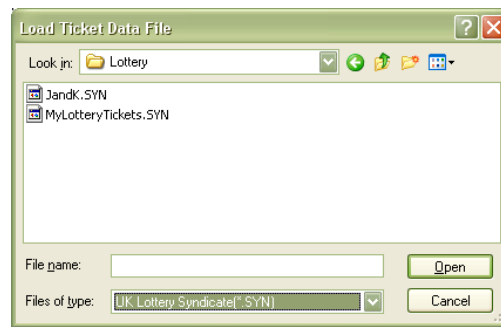

The output produced may look something like :-

Consequently you can open this file with your favourite text editor.

10.7 Importing Syndicate Files.

To import a syndicate file, click LOAD and change the file type to (*.SYN)

Select the Syndicate file you want to import and the software will do the rest.

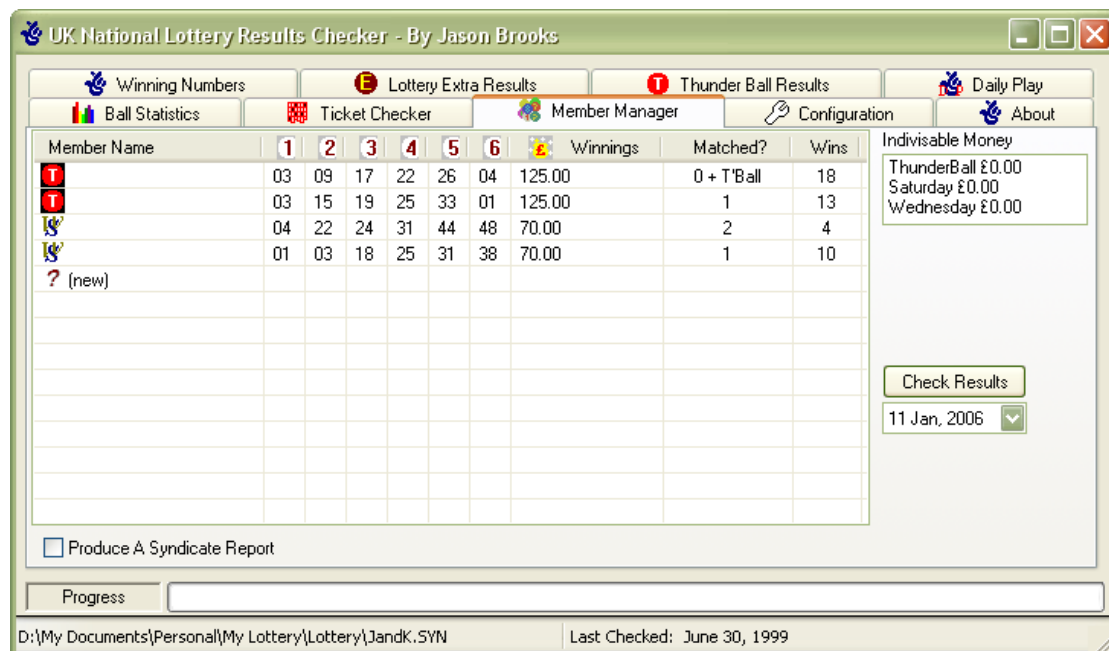

N.b. You will not see the syndicate member's name against each ticket at present. The ability to import syndicates is provided to allow an alternate way of checking ticket data.

10.8 Start-up.

The lottery software will try to load the last Ticket or Syndicate file used.

11 Member Manager.

This section of the program allows you to set up a Syndicate and track each member's winnings over a period of time.

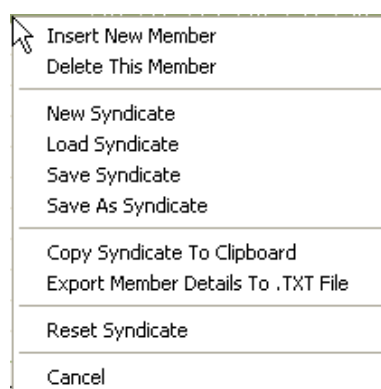

11.1 Icon Definitions.

- S** - Numbers Used on a Saturday Night Draw Only.
- W** - Numbers Used on a Wednesday Night Draw Only.
- S** - Numbers Used on Both Wednesday and Saturday Night Draws.
- T** - Numbers Used for a Thunder Ball draw only.

11.2 Member Manager Pop-Up Menu.

Right click anywhere within the Member Manager and you will see this pop-up menu.

11.3 Adding a new member.

To add a new member, you can either double click the (new) Icon, or right click your mouse to bring up a menu and select *Insert New Member*. You will see the Member Details dialog box. Enter the member's name and your lottery numbers. The check boxes are used to indicate which nights the draw numbers should be used for. Some people may use the same set of numbers for both Wednesday and Saturday night draws.

If you are setting up a syndicate and you want to try your luck, click the Choose Random Numbers to generate a set.

The Current Winnings section is the pence amount of your member's winnings to date.

For example, if your syndicate won £20 to date and you are setting up the member using this package, enter 2000 into the Amount field. (Note, it does not allow a decimal point. Consequently if you enter the value 20, it will be interpreted as 20 pence and not 20 pounds!)

You can change the won amount by editing this field; say for example one of your syndicate members used some of their money.

A screenshot of a 'Member Details' dialog box. It has a title bar with a close button. Inside, there is a 'Name:' label followed by a text box containing 'Jason'. Below this is a 'Selection' section with six number boxes containing 4, 22, 24, 31, 44, and 48. Under the numbers are four checkboxes: 'Wednesday' (checked), 'Saturday' (checked), 'Lottery Extra' (unchecked), and 'Thunderball' (unchecked). Below the checkboxes is a button labeled 'Choose Random Numbers'. At the bottom of the dialog is a 'Current Winnings:' label followed by a text box containing '7000'. At the very bottom are 'OK' and 'Cancel' buttons.

11.4 Deleting A Member.

You can delete a Syndicate member by right clicking on the member you want to delete and selecting Delete This Member.

11.5 Amending Members Details.

To amend a syndicate member's detail, double click the member's name to produce the Member Details Dialog box.

11.6 Creating a New Syndicate.

Right click the mouse in the Member Manager Area and select New Syndicate. If the current syndicate you are working on has not been saved, you will be prompted to do so.

11.7 Load A Different Syndicate.

Right click the mouse in the Member Manager Area and select Load Syndicate.

11.8 Save A Syndicate.

Right click the mouse in the Member Manager Area and select Save Syndicate.

11.9 Save As Syndicate.

Right click the mouse in the Member Manager Area and select Save As Syndicate.

11.10 Copy Syndicate To Clipboard.

Right click the mouse in the Member Manager Area and select *Copy Syndicate To Clipboard*. This option places all the Syndicate information on to the windows clipboard. You can paste this into your favourite application by pressing CTRL+V, or Edit->Paste from the menu.

11.11 Export Member Details To .TXT File.

Right click the mouse in the Member Manager Area and select *Export Member Details To .TXT File*. This option will let you save the Syndicate Details in a text file that can be edited using Notepad or your favourite text-editing tool.

11.12 Reset Syndicate.

Selecting this option will reset the amounts won by each syndicate member to zero. You might want to do this whilst you are experimenting with the software, or you have paid all your members from the syndicate kitty.

11.13 Cancel.

Cancels the menu.

11.14 Last Checked Message.

This message in the display area, indicates when the Syndicate was last checked. By default this picks the latest lottery results held in memory, with the assumption that you are starting a new syndicate.

For example, if the latest lottery results downloaded are the 2nd October 1999, then the Last checked date would be 2nd October 1999. At this point the Check Results button will be disabled.

11.15 Check Results Button.

This button will only be enabled when there are later results available than the last time the syndicate was checked. For example: -

If your syndicate was set up on 2nd October, and the Last Checked date is also 2nd October, then the Button will be enabled when the results for 6th October or later have been downloaded. When the Check Results Button is pressed, the software will now check all your syndicate entries from the 6th October to the latest results. The Last Checked will now become the latest date result downloaded.

Basically, it's a running check on how your syndicate is progressing. Once the syndicate has been set up, all you need to do is click the button to have an up to date total of your winnings.

11.16 Back Dating A Syndicate.

If you want to check your member's syndicate from a previous date and you are not happy with the default date set up in the member manager, you can backdate the syndicate by up to one year. For example, if you set up your syndicate on the 2nd January 1999, and you want to know how much you have won, click the Backdate drop list box and select the 30th December 1998. This means that the syndicate was correct at that moment in time and so checking would commence from 2nd January.

11.17 Un-dividable Money.

A list on the right shows the amount of money that remains in the lottery kitty that was not divisible between its members. For example, say you had three members in the syndicate and you won £10 for three numbers, this means you each get £3.33. One penny however remains in the kitty, because this couldn't be divided equally between each member. This remainder will be added to your next set of winnings.

11.18 Producing A Syndicate Report.

You can produce a .TXT report file detailing the number of wins and amounts your syndicate has won since the last check. This can be a weighty report if you're backdating over a long period of time. The software will ask you for the save location of the report it will generate. You can open this using your favourite text editor.

You will be asked the type of report you wish to generate.

Currently two report types are supported: -

11.18.1 Comprehensive Audit Trail

This report will detail each syndicate member's winnings for each lottery draw that is checked. For an average syndicate this can produce reports in excess of 200 pages for the whole year. This is provided to give a clear Audit trail of player's winnings.

11.18.2 Short Report

This report will be more favourable and will show which weeks you have won and the share amount per person.

If you do not want to produce this report, simply uncheck the box.

11.19 Unknown Amounts

If you check your syndicate before all the lottery results are known, for example how much you win for 4 balls, the software will ask you to input the Sterling amount. Chances are this will be unknown until you cash your ticket in. It is usually advisable to wait until all lottery results are known.

11.20 Matched? Column

This column indicates the number of Balls that were matched against the latest set of Lottery Results held within the program. For example, if you've downloaded the lottery results for the 15th January 2000, then this column will show you how many balls matched against the result for 15th January 2000.

11.21 Wins Column

This column keeps a count of the number of lottery wins each line has achieved throughout your syndicates life span.

11.22 Daily Play and Lottery Extra

Please note this functionality is currently in the process of being implemented.

12 Configuration.

The Configuration tab provides information on the Lottery program.

12.1 Lottery Results File Location.

Shows where the results file will be stored and loaded each time the software starts. You can change the file location by clicking change and choosing a new location.

12.2 URL For Updating The Lottery Information.

This provides details of the URL's accessed whilst obtaining lottery updates.

12.3 Last Lottery Ticket Data File.

Shows the location of the Last Ticket Data file accessed by the Ticket Checker program.

12.4 Last Syndicate File.

Shows the location of the Syndicate file accessed by the Ticket Checker program.

12.5 Upgrade Info.

By un-checking this box, you will prevent the software checking the Internet for a later version.

12.6 Ask to download results at startup

If you have a broadband or LAN connection then untick this box. For dial-up users this will make the program ask before connecting to the internet.

12.7 Reset Registry Info.

By clicking this option, the software will remove from the registry any changes and keys it has added. Currently all keys are in [\\HKEY_CURRENT_USER\\Software\\Jason_Brooks\\Lottery](#). You may need to use this option if the program generates a lot of error messages, or does not seem to be functioning correctly.

12.8 Configure Proxy Server Info.

Select this option if you are using the software from behind a firewall. You may need to contact your local LAN administrator for configuration details.

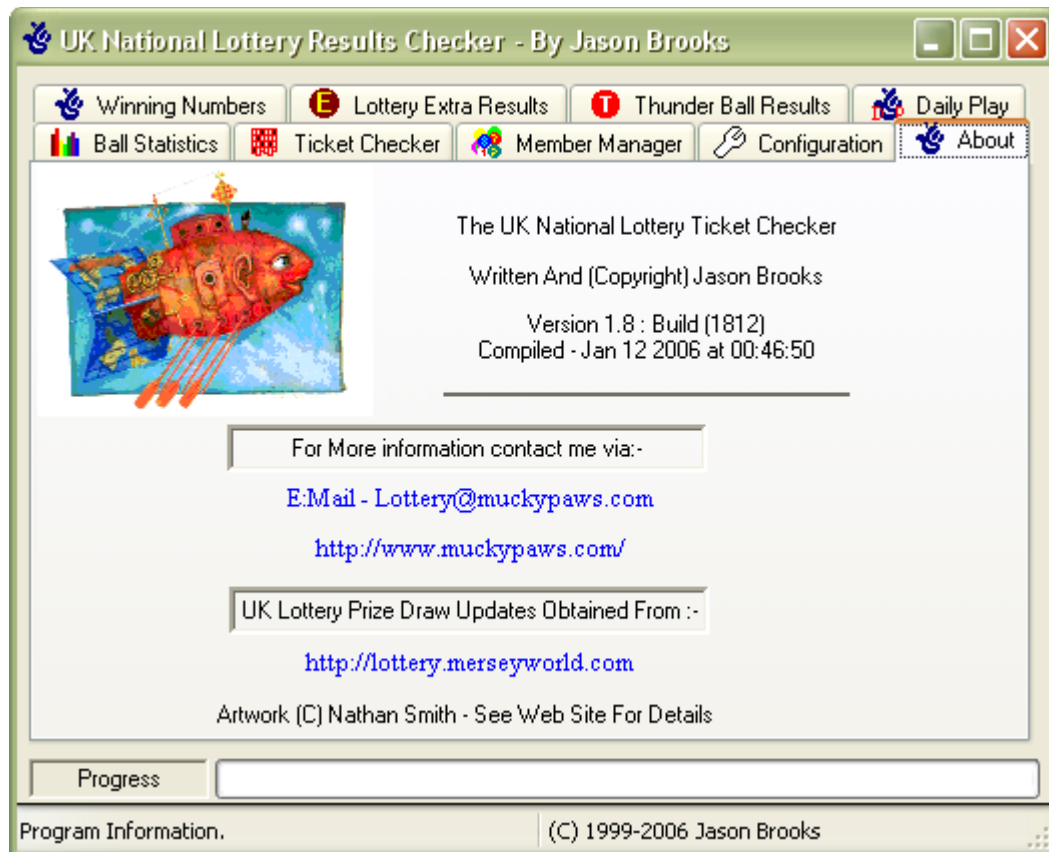

Enter the relevant information. You will be asked for your User Name and Password each time you access the Internet. The software does not store or transmit your Username, Password or Firewall information.

13 About.

Finally, no program can be complete without the ABOUT box. This box provides information such as Version and Build number.

You can click on the links (in blue) to send E-mail, or go to the Web Sites. Please note you will need Internet Explorer 5 for this.

If you have a query regarding the software, I would advise you to click the e-mail link; as this will provide the version information required to answer your queries effectively.

14 Technical Information.

The following details the C structure for the file formats of this software. The application is written using Microsoft Visual C++ 6.0 service pack 6, structures are aligned on an 8 Byte boundary.

14.1 Thunderball Structure

```
// ThunderBall Results Structure
typedef struct data_array3{
    //char Date[12];
    unsigned DD: 5;        //(1-31) = 5 Bits
    unsigned MM: 4;        //(1-12) = 4 Bits
    unsigned YY: 6;        //(Year-1990) In Range of 1990-2038
= 6 Bits

    //char Ball1;
    unsigned Day: 1;
    unsigned Ball1: 6;
    unsigned Ball2: 6;
    unsigned Ball3: 6;
    unsigned Ball4: 6;
    unsigned Ball5: 6;
    unsigned BallT: 6;
    unsigned Machine: 2;
    unsigned Ball_Set: 4;
    _int64 Jackpot;
    int Wins;
    //char draw[5];
    struct data_array3 *next;
    struct data_array3 *last;
}
Thunder_Data;
```

14.2 Lottery Extra Structure

```
typedef struct data_array_extra{
    unsigned DD: 5;        //(1-31) = 5 Bits
    unsigned MM: 4;        //(1-12) = 4 Bits
    unsigned YY: 6;        //(Year-1990) In Range of 1990-2038
= 6 Bits

    unsigned Day: 4;
    unsigned Ball1: 6;
    unsigned Ball2: 6;
    unsigned Ball3: 6;
    unsigned Ball4: 6;
    unsigned Ball5: 6;
    unsigned Ball6: 6;
    unsigned Machine: 6;    // Upto 63 Machines!
    unsigned Ball_Set: 6;
    _int64 Jackpot;
    int Wins;
    int drawnum;
} Extra_Data;
```

14.3 Daily Play Structure

```
typedef struct DailyPlayTag{
    //char Date[12];
    unsigned DD: 5;        //(1-31) = 5 Bits
    unsigned MM: 4;        //(1-12) = 4 Bits
    unsigned YY: 6;        //(Year-1990) In Range of 1990-2038
= 6 Bits

    unsigned Day: 3;        // Six Day Lottery
    unsigned Ball1: 6;        // First Number
    unsigned Ball2: 6;        // Second Number
    unsigned Ball3: 6;        // Third Number
    unsigned Ball4: 6;        // Fourth Number
    unsigned Ball5: 6;        // Fifth Number
    unsigned Ball6: 6;        // Sixth Number
    unsigned Ball7: 6;        // Seventh Number
    unsigned Machine: 6;        // Support upto 63 Machines!
    unsigned Ball_Set: 6;        // Support upto 63 Ball Sets
    _int64 Jackpot;        // Should Be £30,000
    _int64 Match4Win;        // No of Winners Matching 4 Numbers
    _int64 Match5Win;        // No of Winners Matching 5 Numbers
    _int64 Match6Win;        // No of Winners Matching 6 Numbers
    _int64 Match7Win;        // No of Winners Matching 7 Numbers
    int drawnum;        // Draw Number
} DailyPlay_Results_Data;
```

14.4 TDF (Ticket Data File) Structure

This file consists of :-

```

    UINT    COUNT;                // Number of records in the file
    char     VersionHeader[33];    // Contains "V0.1 TICKET DATA (C) Jason Brooks"

    // Following contains the ticket data [0..COUNT]

typedef struct tagTicket
{
    unsigned Ball1: 6;
    unsigned Ball2: 6;
    unsigned Ball3: 6;
    unsigned Ball4: 6;
    unsigned Ball5: 6;
    unsigned Ball6: 6;
    unsigned CheckWednesday: 1;
    unsigned CheckSaturday: 1;
    unsigned Thunderball: 1;
    unsigned Extra: 1;
} Ticket_Data

```

14.5 SYN (Syndicate Data File) Structure

This file consists of :-

```

    int      COUNT;                // Number of records in the file
    char     VersionHeader[19];    // Contains "SYNDICATE FILE V1.2"
    CTime    g_LastDateChecked;    // MFC Time Of Last Check
    double   g_Remaining_WinningsWed;
    double   g_Remaining_WinningsSat;
    double   g_Remaining_WinningsThunder;

    // Following contains the ticket data [0..COUNT]

typedef struct tagMemberV2
{
    // Define Message Bitmap
    unsigned Balls_Present: 1;
    unsigned Winnings_Present: 1;
    unsigned Name_Present: 1;
    unsigned Wednesday: 1;
    unsigned Saturday: 1;
    unsigned Ball1: 6;
    unsigned Ball2: 6;
